

## MYGALE FIA F3 R : PRODUCTION LAUNCH

### Formula 3 news - March 2018

The design office at **MYGALE**, with its partner AEHR, has finalized the aerodynamic studies for the future **MYGALE** FIA Formula 3 Regional.

This new car is largely inspired from the new Formula 1 regulations with a wider, longer and lower car, equipped with 10" PIRELLI tires at the front and 12" at the rear. The monocoque, designed in partnership with HP Composites, meets the new requirements of the FIA with the addition of a HALO.

Built at Magny-Cours, the **F3R MYGALE** will be equipped with a turbo engine developed by our partner ORECA respecting the FIA power-output target of 270 hp.
