

A path to the Indy Lights

What's happening in Formula 3 Regional - February 2020

For its 3rd edition, the F3 Americas Championship offers some new features: a new city race added to the calendar, which includes 7 dates on legendary North American circuits. In addition, the winner of the 2020 season will be offered a scholarship to participate in the full Indy Lights season of the following year.

Keen to offer an affordable series, the championship uses the JS F3 chassis, built by Ligier Automotive in collaboration with **MYGALE** and fitted with Honda engines and Hankook tires.
