

## **XC Cross Car first test drive**

### **XC Cross Car Mygale on Issoudun track**

In this period complicated by the effects of COVID 19, the 2020 FIA European Cross Car Championship has been cancelled and so MYGALE took the opportunity to produce an entirely new chassis designed by the MYGALE design office.

The new design takes into account our experience of our first model designed in collaboration with CAMOTO and we aim to compete for the European title as early as 2021. Lighter, with better weight distribution and double wishbone suspension front and rear equipped with XTREM shocks, it has been designed around the YAMAHA MT09 engine

### **Discussions between Philippe Dunabin, Mygale technical director and Johnny Feuillade, European auto-cross champion.**

Several test sessions were carried out at Magny-Cours and then on the Issoudun circuit with the European Autocross Champion Johnny Feuillade, who was surprised by the performance of the Cross Car out of its box.

Mygale is finalising the integration of the FIA engine kit before resuming a series of validation tests on the Cross Car before its production launch scheduled for the end of September.
